PROFESSIONAL PROFILE

Full Stack Developer based in Jerusalem with a background in digital marketing, web design and content creation. I build responsive web applications using React, Next.js, Node.js, Express, MongoDB and Django. My goal is to create clean interfaces, useful features and structured web projects while continuing to grow within a professional team.

SELECTED PROJECTS

FitWell — Health & Fitness Platform

Django · Django REST Framework · PostgreSQL · JWT · Swagger · Docker

Backend-focused health and fitness platform with REST API logic, content management and deployment-ready structure.

- Built API logic for articles, comments and user-related features.
- Implemented authentication, documentation and backend architecture.

OpticGlass — Premium E-commerce Application

React · Vite · Tailwind CSS · Node.js · Express · MongoDB

Modern premium eyewear e-commerce application focused on product presentation and user experience.

- Created product catalog, detail pages and reusable frontend components.
- Structured frontend/backend logic for an e-commerce-style application.

Digital Business Card App — SaaS-style Application

React · Node.js · Express · MongoDB · JWT · Tailwind CSS

Digital business card platform with authentication, protected routes and dashboard-oriented logic.

- Implemented user authentication and role-based logic.
- Connected frontend and backend features with a structured full stack approach.
